

Transaction Risk Report

A transaction-level report explaining score drivers, supplier indicators, duplicate-payment risk, and review recommendations.

Sample report

This document uses sample/anonymised data and is intended to demonstrate the style of evidence SentraRisk can produce for finance, compliance, bookkeeping, and client review workflows.

Xero Supplier bill review	PDF Client-ready export	Human Decision-led workflow
-------------------------------------	-----------------------------------	---------------------------------------

Report type	Prepared for	Review period
Risk detail PDF	Example SME finance team	Sample month

Transaction summary

Field	Sample value
Supplier	Northline Facilities Ltd
Amount	EUR 12,850.00
Source	Xero supplier bill import
Review status	Escalate before approval
Assigned reviewer	Finance lead

Risk score

87/100 Risk score	High Risk level	Review Recommended action
-----------------------------	---------------------------	-------------------------------------

Primary review outcome

The transaction should be reviewed before release because it combines a material amount, recently changed beneficiary information, and duplicate-payment indicators.

Score drivers

Driver	Signal	Review impact
Amount threshold	Payment exceeds normal SME review threshold	Adds materiality to the alert.
New beneficiary details	Supplier payment details recently changed	Requires independent confirmation.
Duplicate-payment risk	Similar supplier amount appears in the sample period	Check invoice number and supporting evidence.
Timing pattern	Raised close to payment run cut-off	Review before payment release.

Reviewer actions

Step	Action	Evidence to record
1	Confirm supplier bank details using an independent contact route	Named contact, date, and confirmation method.
2	Check for duplicate invoice number, amount, and payment reference	Invoice evidence and comparison result.
3	Confirm business reason for the payment timing	Approver note or supplier statement.
4	Approve, hold, or reject with reviewer rationale	Final decision and owner.

Decision note template

Reviewer note

Payment held pending independent supplier-bank-detail confirmation. Duplicate-payment check to be completed against Xero bill history before approval.

Control recommendation

If similar alerts recur, introduce a standing control requiring second approval for supplier-bank-detail changes and duplicate-looking supplier bills above the agreed materiality threshold.
